

FLOW-METER 10-100 / 3.8" NEW

The new BRITA FlowMeter add-on module ensures more clarity and operator convenience with BRITA filter cartridges.

Once the relevant filter capacity has been programmed, the BRITA FlowMeter calculates the current residual capacity of your filter cartridge by recording the water flow volume and displays it where it can be read easily.

The FlowMeter is the ideal add-on module for the BRITA filter cartridge systems.

Memory call-up of the last 5 filter cartridges with usage period and flow quantity
Warning display and battery exhaustion
Memory remains intact even after battery change
